Reference lists

Lists similar to this, on special subjects or on topics of current interest, are published from time to time. They may be obtained free of charge by applying either at the central library or at one of the branch libraries.

For a complete list of Seattle Public Library publications, see inside of back cover.

Harbors and Docks

This list of books, pamphlets, reports, and periodical references on harbors, harbor engineering, docks, and port administration is printed in the hope of making the material more useful and available. The list contains all the best material which the library has on these topics. As a general rule, references to government documents have been excluded except those to ports in the state of Washington.

An "R" prefixed to the call number of a book indicates that it must be called for and used in the reference room. An asterisk (*) preceding the author's name indicates that another copy may be found in the circulation department. Pamphlets are designated by the abbreviation "Pam." prefixed to the call number. Bound periodicals, government documents, and pamphlets are in the reference department.

Upon request from a borrower at any one of the branches, any book on this list in the circulation department will be sent to that branch and the person requesting the book will be notified of its arrival.
